of Kagoshima University)

## Seminar for International Issues

**No.2 in 2010**

**“How we can develop more international  
atmosphere in Kagoshima University?”**

We wish to propose the modification on the way to organize the Seminar. Although the Seminar was initiated by short speech on international issues by me and followed by discussion, such style will be modified. The Seminar will mainly be promoted by active intervention by you on particular topic<sup>1</sup> without short speech. The Seminar will also be promoted by moderator selected (rotational basis) among the participant. The moderator may promote the session so as to have a kind of conclusion or proposals (If we found it difficult to have a conclusion in some topics within the limited time, discussion of the issue might be continued in the following Seminar.).As we hope the output of Seminar can be implementation of the recommendation reached by the Seminar, action-orientated debates will be focused in the Seminar.

The recommendations reached at the Seminar will be summarized by me as short report for any possible actions. It is therefore hoped that these recommendation will jointly be proposed to the appropriate sections by the Seminar in collaboration with Center for International Planning. As such modification is provocative and experimental basis, we cannot foresee on how action-oriented approach lead to improvement the issues, but ask your increasing support for the Seminar. It is also appreciated if you can also invite your friends to the Seminar, as we wish to accommodate the views of more people in new approach of the Seminar.
